DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 2, 4-9 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 6,676,245 in view of Drake (5,160,945).

'245 teaches all claimed features of the invention except the pagewidth printhead comprising tow or more modular printheads. It is well-known in the art to have a pagewidth printhead having a plurality of modules as taught by Drake. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the invention of '245 to incorporate the teaching of a plurality of modules as taught by Drake for the purpose of increasing throughput.

Claims 1-11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 and 12 of U.S. Patent No. 6,799,836 in view of Drake (5,160,945).

'836 teaches all claimed features of the invention except the pagewidth printhead comprising two or more modular printheads. It is well-known in the art to have a pagewidth printhead having a plurality of modules as taught by Drake. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the invention of '836 to incorporate the teaching of a plurality of modules as taught by Drake for the purpose of increasing throughput.
